DETAILED ACTION

Application Serial Number 09/458,354 has been transferred to a new examiner of record to continue its prosecution on the merits. Accordingly, in case of any questions or comments, please contact Examiner Mendez at telephone number 571-272-4952.

Response to Amendment

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn. In view of the change in the Examiner of Record and the need for the new examiner to become familiar with the subject matter of this case, the same Office Action introduced by Examiner Nguyen is again presented below for further comments and review in a non-final status.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by **Condon, et al.**, U.S. Patent No. 5,188,596. For specific comments, please refer to the previous Office Action mailed on July 15, 2004.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3763

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

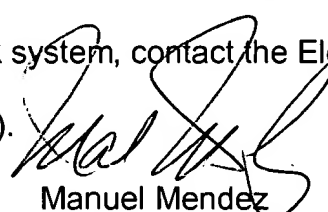

Claims 8-10, 12, and 14-26 rejected under 35 U.S.C. 103(a) as being unpatentable over **Condon, et al., in view of Muni, et al.**, U.S. Patent Number 5,316,706. For specific comments, please refer to the previous Office Action mailed on July 15, 2004.
